ABOUT ME

Android Developer with 4 years of experience building scalable and user-friendly applications using Kotlin and Jetpack Compose. Skilled in MVVM architecture, REST API integration, and modern Android development practices.

CORE SKILLS

- **Languages:** Kotlin, Java, SQL, JavaScript (Node.js), PHP
- **Mobile Development:** Android SDK, Jetpack Compose, XML UI, Material3, RecyclerView, Animations
- **Architecture and Design Pattern:** MVVM, Clean Architecture, MVC, MVP, MVI, Offline-First Approach
- **Network and APIs:** RESTful APIs, Retrofit, Volley, JSON Parsing
- **Database Management:** RoomDB, SQLite, MySQL (Local & Remote Data Handling)
- **Concurrency & Reactive Programming:** Kotlin Coroutines, Flow, StateFlow, LiveData
- **Dependency Injection & Tools:** Hilt, ExoPlayer, BroadcastReceiver, Foreground Services
- **Backend Development:** Node.js (Basic API Development & Integration)

EDUCATION

Master of Computer Applications(MCA)|2023-2025

Indira Gandhi National Open University

Bachelor of Computer Applications (BCA) | 2016 – 2019

Maharshi Dayanand University, Rohtak

- Graduated with 70%

Senior Secondary (CBSE) | 2014 – 2016

Apex Public School

WORK EXPERIENCE

Android Developer | Rapid Staffing and Training Solutions

Apr 2022 – Mar 2026

- Developed an AI Chat Application using Kotlin & Jetpack Compose with real-time responses via Gemini API
- Implemented Room Database for persistent local message storage
- Designed responsive chat UI with message bubbles, typing indicators, and clipboard features
- Managed app state using ViewModel & StateFlow for dynamic UI updates
- Integrated REST APIs using Retrofit and Coroutines for efficient networking
- Followed MVVM and Clean Architecture for scalable and maintainable code

PROJECTS

AI CHAT APPLICATION

- Built AI-powered chat app with real-time responses and modern UI using Jetpack Compose
- Implemented local caching and smooth UI updates with StateFlow

AUDIO & VIDEO PLAYER

- Developed media player using ExoPlayer with support for audio/video playback
- Implemented Foreground Service, Notifications, and PiP mode
- Built dynamic UI with ViewPager2 and efficient media handling

FILE SHARING APPLICATION

- Developed a secure file-sharing system using Java and JSON with unique access codes
 - Reduced file access time by 30% and improved user satisfaction to 95%
 - Implemented efficient API handling using Retrofit
-

CERTIFICATIONS

- Full Stack Android Development – Neat Roots
 - Android App Development Bootcamp (Kotlin) – Udemy
 - Master Android by Building 3 Apps – Udemy
 - Machine Learning Crash Course – Google
 - Build 3 Applications from Scratch (Java) – Udemy
-

HOBBIES

- Meditation
- Diary Writing
